City Cloud Phone – Handset Pricelist

City Cloud Phone – Hardware Pricelist – March 2021

All hardware provided for City Cloud Phone from City Communications come pre-provisioned and ready for use.

City Cloud Phone uses IP phones. We've a broad range that you can choose from, depending on your employees' needs. We'll also configure them for you so they're ready to use as soon as you get them out of the box. We can help you decide the models that you need for your business when we talk with you.

We've tested and configured all our IP phones to make sure they work perfectly with our City Cloud Phone service. So to make sure you experience the quality of calls you'd expect, only IP phones from the City Cloud Phone portfolio can be used.

To complement these IP phones, we have a range of Headsets that can be used to enhance your experience. These are sourced from leading edge suppliers and can be purchased when you order your City Cloud Phone service.
